

My names is Karen Nasuta ,My husband Jeffery and I reside at 83 Thrall Road in Broad Brook, CT. First I would like to indicate that all the houses on Thrall Road have the water filters installed in their homes, I did not get ours installed until 2004 two years after we purchased our home when we were solicited by Aqua Pump when they went to our neighbor's to do their water test. I later found out that we were on a shared well with one of the neighbors and this is why the house did not have filters. Here is the concern, all the houses on my road have until 2018 but our house is no longer part of the lawsuit. We would like to know why only our house is not covered until 2018 like my whole street. Every single house is part of the lawsuit but mine and I have no answers.

We would also like to know if there are any other alternatives. Can we get on city water? if no why? Are there any funding to help with the filters being serviced? if no why? We need answers. We need assistance with maintaining the filers.

We live pay check to pay check and with Oil and Gas prices soaring, I just can not afford another bill. We worry about the chemicals in our water, as I'm sure you would too.

We are not able to be at the hearing tomorrow as it was such short notice to get off of work. We are hoping that we will receive some kind of answers soon.

Sincerely,

Karen and Jeffery Nasuta
